Cost
Effective

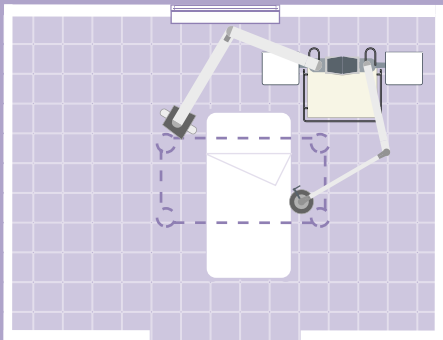

- Weight : 80 kg (including fixing)
- Payload : 120 kg
- Fixing system : adjustable anchor plate for direct bolting on concrete or metal structure
- Bolting : 4 M 12 heavy loading metal anchors

Modular approach with back to back linking or 2 identical profiles fulfils needs of every ICU users

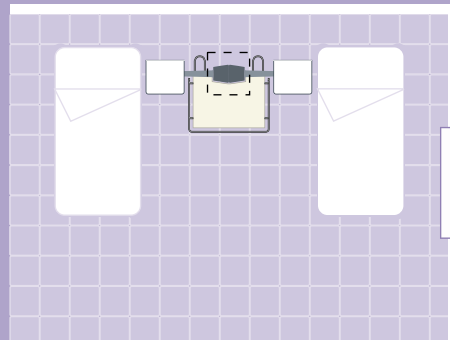

Two opportunities :

- Front side with medical gases for visual control of medical accessories (for example : one trunking providing two beds)
- Front side with the mostly used electrical sockets and gas outlets (for example : one bed per room configurations)

Resuscitation

ICU configuration with bed in room axis, allowing position evolution to enable patient windows view

Recovery

- 1 trunking for 2 beds
- Full access to patient head on free side
