# TELEBLOCK K<sup>45</sup>

Raise  
your connections  
to the highest level

Raise and connect.  
That easy, that quick.

The Simon Connect **TELEBLOCK K<sub>45</sub>** solves all your eventual connection needs by adapting to any kind of furniture.

**Technology and innovation**

The fact that it can be **raised automatically** lends it a unique appearance of technological advance.

**Design, image and originality**

The **TELEBLOCK K<sub>45</sub>**'s **design and originality** make it an object with a **top level image**.

**Integration**

· **Perfect adaptation** in areas where it can be hidden if you wish. Orderly and hidden cables.

**Accessibility**

· Since it is **installable in any space**, it is very comfortable for accessing and connecting. You don't have to look for connections on the wall or on the floor.

· **Functionality and connectivity.** It enables power, voice and data, multimedia and switches/pushbuttons for lights, blinds to be connected and equipment to be turned on and off...

► **Customization**

Covers available in two finishes: **graphite grey** and **matt chrome**.

Possibility to customize the finishes with the company's corporate color.

► **AUTOMATIC RAISING\***

\*Optional for the version of 5 mechanisms K<sub>45</sub>.

► **Offices, meeting rooms and conference rooms**

Every kind of connections is solved with **TELEBLOCK K<sub>45</sub>** at office tables, meeting rooms and conference rooms. The connections are within reach.

► **Public areas**

The areas with crowds and sizeable use such as airport lounges and shopping malls, among other places, make it necessary to devise complete connectivity solutions with easy access.

► **Hotels**

Suitable for equipping hotel room desks by adapting to the surroundings.

► **Kitchens**

The **TELEBLOCK K<sub>45</sub>** solution for kitchens is as original as it is practical because it fits in perfectly with cabinets. The electrical connection is located where you need it, and is hidden after use.

Choose your **TELEBLOCK K<sub>45</sub>**
